

Dublin Certificate in Evidence Based Dementia Care

Aim of the programme

To enhance the learner's knowledge, skills and competence when providing person-centred holistic care and support to people living with dementia, and their family and carers.

- Understand dementia as a syndrome and the presenting characteristics of the most common subtypes of dementia.
- Discuss the concept of person-centred care and personhood and how these concepts underpin holistic dementia care.
- Understand the importance of effective interpersonal communication skills and apply person-centred communication strategies when caring for people living with dementia and their carers.
- Support an understanding of the evolving and changing evidence as a consequence of research conducted on people living with dementia.
